TEX_G1: consensus pathways by theme
Interferon γ response
Influenza A
Negative regulation of viral genome replication
Defense response to virus
Mitotic spindle
G2/M checkpoint
Microtubule cytoskeleton organization involved in mitosis
Mitotic sister chromatid segregation
E2F targets
Cell cycle
Regulation of chromosome separation
Regulation of chromosome segregation
Complement
Phospholipase activator activity
Lipase activator activity
Pyroptotic inflammatory response
NOD-like receptor signaling pathway
Pyroptotic cell death
Positive regulation of interleukin-1 production
IL-2 STAT5 signaling
Encephalomyelitis
Protein serine/threonine kinase inhibitor activity
Kinase inhibitor activity
Protein kinase inhibitor activity
Enzyme inhibitor activity
TNF-α signaling via NF-κB
Regulation of neuroinflammatory response
Neuroinflammatory response
Macrophage activation
Kinesin binding
