TEX_G2: consensus pathways by theme
Microtubule cytoskeleton organization involved in mitosis
Regulation of attachment of spindle microtubules to kinetoc…
Mitotic sister chromatid segregation
Phosphorylation of the APC/C
G2/M checkpoint
G1 to S cell cycle control
Cell cycle (KEGG)
Cell cycle (WikiPathways)
Regulation of PLK1 activity at G2/M transition
AURKA activation by TPX2
Establishment of spindle orientation
Recruitment of NuMA to mitotic centrosomes
Resolution of sister chromatid cohesion
Mitotic prometaphase
Cell cycle checkpoints
Amplification of signal from the kinetochores
Interferon α response
Interferon γ response
E2F targets
Interconversion of nucleotide di- and triphosphates
Deoxyribonucleotide biosynthetic process
2'-deoxyribonucleotide biosynthetic process
Pyrimidine metabolism
Positive regulation of mitotic cell cycle phase transition
Positive regulation of G1/S transition of mitotic cell cycle
Positive regulation of cell cycle phase transition
Positive regulation of mitotic cell cycle
G2/M checkpoints
HDR through homologous recombination (HRR)
Single-stranded DNA helicase activity
Homologous DNA pairing and strand exchange
Phagocytic vesicle
